THERAPEUTICS™

NetResults™ Performance

Get the right meds and great value

Prime Therapeutics (Prime) manages your pharmacy benefits. We also manage the drug list (formulary) that your plan covers. Your plan's drug list is called NetResults™ Performance.

At Prime, we are here to provide you with the same care we'd want for our loved ones. We work with your health plan to make sure the drugs included in NetResults™ Performance are the right ones for your needs.

How do you benefit?

Save

Our experts review each drug's cost to help make sure every drug is as affordable as possible.

Simplify

You and your care team don't have to wonder which drugs your plan covers — the info's all there on the NetResults drug list.

Support

Our team of independent physicians, pharmacists and health plan representatives reviews each drug for safety and clinical efficacy (how well it works). This helps protect your health and ensure you're getting effective meds.

What if your current drugs aren't included?

Many drugs are included in NetResults™ Performance. If a drug isn't included, another drug that works just as well is likely available. Talk to your doctor to learn more about options.
